

Air hose structure and performance

Inner Glue Layer: black oil resistant synthetic rubber.

Reinforcing Layer: one layer of high strength steel wire braiding (1W / b)

Outer Layer: Black oil resistant, corrosion resistant, wear resistant synthetic rubber, the appearance of the fabric surface.

Temperature range: -40 ° C to + 100 ° C

This kind of rubber hose buckle joint does not need to peel the external glue. Suitable for construction machinery and continuous operation of hydraulic equipment with GOOD HEAT-RESISTANT OIL ANTI-PULSE PERFORMANCE
